DEFRA

WINDSCREENS AND FENCES

Do you recognise that moment? It's early spring, you step outside and you instantly feel it: those first rays of sunshine on your face. For many people this is a small moment of happiness after the winter months. A fresh wind can, however, result in the temperature on your terrace not feeling all that pleasant yet. Fortunately there's something we can do about that!

Make this your moment

We want it to be about you. We want to make sure you can completely enjoy any time of day whilst at home, both inside and outside! A lovely living environment will give you that ultimate feeling of coming home. Verano®'s windscreens and fences will allow you to turn your house into a safe and comfortable home and give you complete control of your living environment. Make this your moment!

OUTSIDE FOR LONGER

We've said it before, being outside is good for you! It will improve your mood and being active outdoors will help you to relax. Being outside frequently will also make sure you can concentrate more effectively and do your work more efficiently. Ultimately resulting in you having more time left over for the things you enjoy. This is exactly why everyone would like to be able to enjoy their sheltered terrace or balcony from early spring to late autumn, but the wind can sometimes make those temperatures feel a little fresher. Windscreens are the perfect solution for the changing climate.

EXTRA PRIVACY

Everyone loves having a little peek at their neighbours, including you. A quick glance inside as you walk past, a look into the garden if you're sitting on the balcony, or even shamelessly staring at others from the terrace. Of course it's a little less pleasant when it's the other way around, especially when you're enjoying a nice drink with friends and family in your garden, or when you're relaxing with a good book. A fence is therefore certainly never an unnecessary luxury!

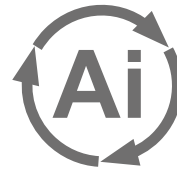

WIND LOAD

The wind load at a certain location is dependent on the wind area and the specific terrain. It's very important to check which solution is most suitable for your garden before positioning a windscreen and/or fence. We would therefore always recommend obtaining professional advice from a Verano® partner.

SUSTAINABLE ALUMINIUM

Our windscreen and fence profiles are made from top quality aluminium. Aluminium boasts characteristics which make it almost maintenance-free and guarantee a long life. We are proud owners of the AluEco certificate. The AluEco foundation promotes sustainability and ensures aluminium is recycled into top quality products.

GUARANTEED QUALITY

We are incredibly confident about the quality of our products, which is why they come with an impressive five year guarantee. Our products can be recognised by the chrome-coloured brand logo and the sticker with the unique product code.

PROFILE COLOURS

The colour of the profiles determines the appearance of your windscreen or fence. The profiles can be coated in any desired colour. The following colours can even be delivered extra quickly.

BEST-SELLING PROFILE COLOUR*

Anthracite structure

If there's a level difference of more than one meter behind or in front of the windscreen, there is a risk of falling through. In such cases only laminated safety glass would be used.

WINDSCREENS

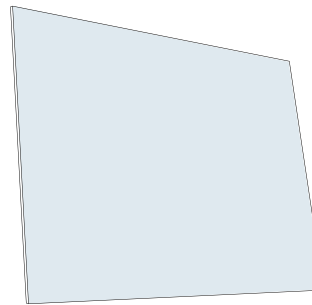

Windscreens are generally positioned as free-standing, but can also be installed underneath patio awnings or a louvered roof. You can choose from various different types of filling for your windscreen, depending on your specific requirements. Are you not sure which type of filling would be most suitable for your terrace or balcony? Your Verano® partner will gladly provide you with expert advice.

GLASS TYPES*

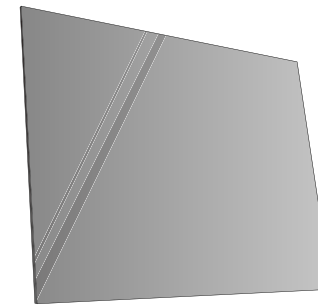

Clear laminated glass

Matt glass

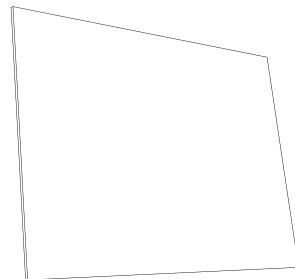

Fumed glass

SOLID TYPES*

Solid white

Solid: solid colour or print

is dependent on the chosen type of windscreen.

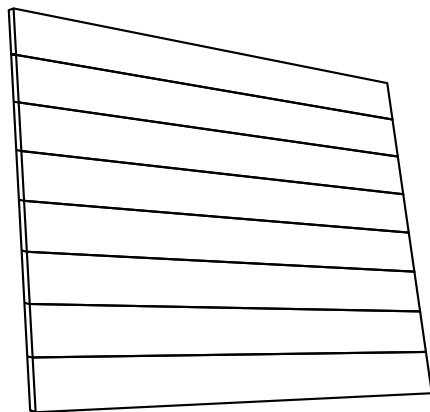

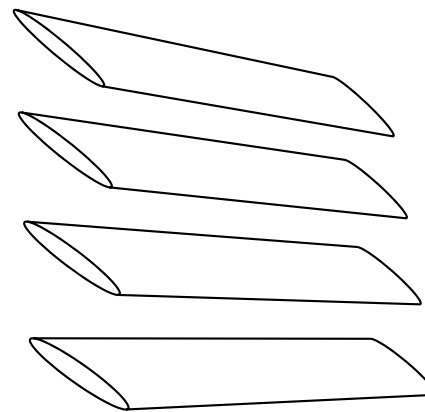

FENCES

Fences can be made with various different filling types: aluminium slats and movable slats. The type of filling is partly dependent on the fence or garden partition's purpose, so make sure you always ask the Verano® partner for solutions for your specific situation.

Aluminium planks

Movable slats

PRODUCT FEATURES

V745 - Lüderitz

1 ELECTRICALLY SLIDABLE

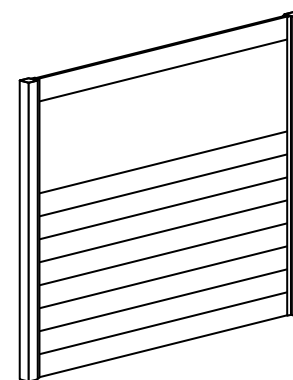

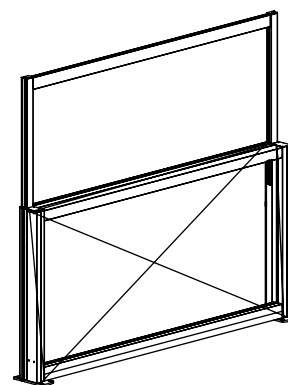

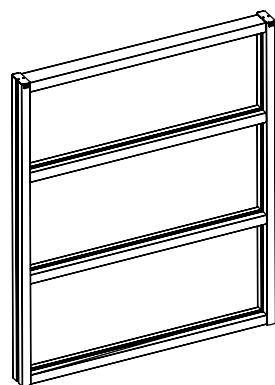

The V745-Lüderitz windscreen is unique as a result of its electrically slidable section. This means you can adjust the height of the windscreen with the push of a button, using a whisper-quiet motor.

2 LINKABLE AND FAST INSTALLATION

Lüderitz windscreens are linkable, allowing you to also fence off wider and/or longer surface areas against wind and other weather conditions. The windscreen system has been designed in such a way that it can be quickly and easily installed.

Model	V730 - Biarritz	V745 - Üderitz	V750 - Martinique
Filling	Glass 5 mm	Glass 5 mm	Aluminium
Various divisions are possible	✓	✓	✓
Movable section	No	Yes	Yes
Operation	No	Electric	Manual
Linkable	Yes	No	Yes

Please note: the maximum dimensions cannot always be combined, ask your Verano® partner about the options.

ALTERNATIVE SOLUTIONS

In addition to windscreens and fences, glass walls also provide the necessary shelter on your terrace. Glass walls can seamlessly link into the patio awnings and louvered roofs and will therefore result in a great complete look for your garden. Would you like some more information about these alternative solutions? Your Verano® partner would gladly provide you with expert advice, perfectly tuned to your personal situation.
